

PRESS RELEASE

## **Rancilio Group Presents the New iSteam Pro**

As of March 2025, Rancilio Group has introduced the **new iSteam Pro steam wand** on traditional Rancilio Classe 20 and Rancilio Specialty Invicta machines.

iSteam Pro is the steam wand designed for automatic milk frothing. It is built to work perfectly with all types of milk, including plant-based alternatives, effortlessly delivering the same high-quality results as a professional barista.

The touchscreen allows precise adjustment of both temperature and froth level, saving up to 10 customized recipes, and activating the automatic wand with a simple tap.

iSteam Pro is easy to use and simple to clean, also thanks to the pre-purge function, which eliminates condensation before frothing.

Ideal for high-volume locations with heavy cappuccino and macchiato production, iSteam Pro is the perfect solution for speeding up service while ensuring consistently perfect froth for every beverage.

Available as an optional feature, the iSteam Pro wand can be installed on the right side, left side, or both sides of the machine.

With this new steam wand, Rancilio Group confirms its commitment to innovation, presenting advanced solutions designed to optimise ergonomics and the workflow of professional baristas and others, as well as optimising operational efficiency for café and coffee shop owners.
